Edgar T. Pickett, Jr. 1980
Richard Hall 1981
Martin McLeod 1982

October 13, 1982

Dear Members and Guests:

It is, indeed, a pleasure for me to welcome each and every one of you to the 23rd Annual Training Conference of the Florida State Division of the International Association for Identification.

Your presence is an indication that you have an interest in upgrading yourself and your department, plus you have an interest in your association and its goals.

If you have never attended a F.D.I.A.I. Conference in Lakeland, you are in for a treat. This is one of the most important happenings each year for members of the F.D.I.A.I. Mingle with the members, renew old acquaintances and make new friends. In many instances, you will find it pays to have contacts throughout the state. You may find the answer to a particular problem you have encountered by talking to someone in the hallway or over lunch. Twenty-one new members have joined the association from October, 1981 through May, 1982. Make yourself known to them, welcome them into our professional organization.

I hope everyone has an enjoyable time while in Lakeland. Please take what you learn back with you and pass it around to others in departments around you.

Sincerely,

Martin L. McLeod,
President

MLM/af

23RD ANNUAL TRAINING CONFERENCE
FLORIDA STATE DIVISION
of the
INTERNATIONAL ASSOCIATION FOR IDENTIFICATION

It gives me great pleasure to welcome the Officers and Conferees of the Florida State Division of the International Association for Identification to the City of Lakeland on the occasion of your 23rd Annual Training Conference.

Identification has always played a key role in accomplishing the law enforcement mission. The successful investigation of the recent Atlanta child homicides underscores the vital need for the services that you perform.

The program that has been prepared for your 23rd Annual Training Conference is an outstanding one. Each of you should return to your agency better informed in the many new approaches to scientific criminal investigation.

We at the Lakeland Police Department stand ready to assist you in any way possible to make your visit enjoyable.

With best wishes for a successful conference, I remain,

Most Cordially,

Lawrence W. Crow Jr.
LAWRENCE W. CROW, JR.

September 20, 1982

Dear Members and Guests:

I would like to welcome you to the 23rd Annual Training Seminar of the International Association for Identification.

You have joined us at a time when the need for training is very important in the law enforcement field. The challenges and opportunities have never been greater. The need for good people like you has never been greater.

We have a great future in front of us as individuals and as a department, serving the community. I am sure that your time will be well spent during this training session.

I wish you the very best.

Sincerely,

Louie Mims

LOUIE T. MIMS
Sheriff

The past three decades have witnessed a revolution in the application of scientific and technical method to crime detection. Anyone who practices in these fields is well aware how vital it is to stay abreast of the advances in chemical, physical, electronic and immunological techniques that have put such a sharp edge on the scientific detective's probe.

Crimes of violence such as robbery, rape, drug abuse and others increase every year, and the scientific detective and lab expert's skill in extracting the evidence from minute traces -- hair, dust, fibers, fingerprints, bloodstains, tissue, burned documents and micro-traces of toxic chemicals -- must keep pace. We need this extra professional effort if we are to successfully prosecute those who commit such crimes.

This training seminar should prove useful to a wide audience. The speakers for this seminar bring a wealth of experience and qualifications in the area of identification, broadly focusing their topics so that all levels of the criminal justice system can benefit from the lectures.

I welcome you to this seminar.

Quillian S. Yancey
State Attorney

WELCOME TO ALL F.D.I.A.I. MEMBERS, FAMILIES
AND VISITORS

We have many social functions and fun events planned for all ages. We welcome all to attend these functions.

Child care will be provided free for these activities that do not include children. This is something we did not offer at the 1979 Seminar, but feel that it would be most accommodating to free the ladies for adult activities. You will be assured of good care and supervision for your children.

Not mentioned in the program is a tour of "Arts in the Park" in downtown Lakeland on October 16, 1982. The "Arts in the Park" Gallery's October feature is "Our Town". The Gallery is open Tuesday through Saturday, from 10:00 AM to 4:00 PM. There is a craft show in the park each Saturday from 10:00 AM to 4:00 PM and items are for sale. Crafts are presented by people from all over the state, so you may see someone you know.

Again, a most hearty welcome to all on these fun-filled days!!

See you October 13!

I'VE HAD ENOUGH OF THIS . . .

Why not discover for yourself what Dactek has known for years? Their inkless fingerprint system is the most modern, practical and sensible way to produce fingerprints.

You might remember Dactek was a pioneer with the original inkless aerosol fingerprint method. But even then we knew that wasn't enough, and worked on creating an even better system. And we were right. Dactek International now offers you a non-aerosol, nonelectrical, inkless, simple TO THE TOUCH system.

How? We coat the paper! Simply run the fingerprint over our inkless impression pad, then make a fingerprint on your form. That's it. No traditional mess, no clean up. And you will reduce your rejection rate dramatically.

In fact, we're worried. It may be too simple. But why not give it a try and judge for yourself? We will be in Booth 901 at the ASIS Convention (Atlanta) and ready to demonstrate for you. Or, if you will not be at the convention, but want to try our new method, send us the completed coupon shown below. We've created a simple sample kit that allows you

to demonstrate for yourself our latest development. There is no cost or obligation; just send us the completed coupon.

Next step? We can coat your present fingerprint cards or provide Standard Forms preprinted and coated for immediate use with our inkless impression pad. The quantity you specify will make the difference in cost and benefits.

Approval? Our fingerprints are acceptable to the FBI for classification, search and retention. In fact, we are confident you will agree that the Dactek method will produce sharp, smear-resistant prints that dry immediately and can lower your print rejection rate.

THE SIMPLICITY OF THE DACTEK ADVANTAGE WILL QUICKLY PROVE TO YOU THAT WHEN IT COMES TIME TO FINGERPRINT IN YOUR ORGANIZATION, THE "I'VE HAD ENOUGH" MESS WILL BE IN THE TRASH, ALONG WITH OUTDATED PROCEDURES, PADS AND INK. HOORAY!

Check Dactek out; our inkless wonder can now be your discovery, too.

Code of Ethics

As a member of the International Association for Identification and being actively engaged in the Profession of Scientific Identification and Investigation, I dedicate myself to the efficient and scientific administration thereof in the interest of Justice and the betterment of Law Enforcement.

To cooperate with other men of the Profession, promote improvement through research, and disseminate such advancement in my effort to make more effective the analysis of the expert.

To employ my technical knowledge factually, with zeal and determination, to protect the ethical standards of the Profession of Scientific Identification and Investigation.

I humbly accept my responsibility of Public Trust and seek Divine guidance that I may keep inviolate the Profession of Law Enforcement.
