

# FDIAI REGION 2 TRAINING

## RECOGNIZING LIVE SCAN DISTORTION

**PRESENTER: BRIANNE BREEDLOVE**

Uncover Forensics

The process of digitally capturing friction ridge impressions can often lead to distortion, the presence of false minutia, and the absence or “dropping” of true minutia. This presentation provides examples of such events and discusses how to recognize when they occur. The goal is to prepare friction ridge examiners to explain these events in court

**Date:** April 11th 2022 1400-1500 hours

**Location:** Live Virtual Zoom Training

**Space is Limited**
